

# Fear Free Strategy Reminders

## Use...

### Considerate Approach

What does the pet see, hear, smell?

How might it contribute to FAS?

### Gentle Control

Comfortable and safely position patient with minimal restraint.

### Touch Gradient

Maintain continual contact throughout entire procedure.

Acclimate the patient to an increasing level of intensity.

Monitor the patient's acceptance and comfort.

### Client & Team Communication

Active listening

Reflective listening

### Prioritize

procedures based on level of need
